Porsche Cayman - Service intervals

There are two types of Porsche services, a minor and a major service, both of which are required at different intervals.

Below is an indicative timeline of the care and maintenance your Cayman requires at different times during its lifetime. Servicing your Cayman at the required intervals will help to ensure your vehicle continues to deliver optimum performance.

Brake fluid change

Over time, your vehicle's brake fluid absorbs moisture from the air. The resulting accumulation of water lowers the boiling point and, under certain operating conditions, can affect the braking action. Therefore, in order to ensure your Cayman continues to provide optimum braking in all conditions, the brake fluid should be changed in accordance with the change intervals stated in your Owner's Manual*.

*As the brake fluid change interval is independent of the vehicle's mileage, it may fall outside of a minor or major service.

Minor service for your Cayman

What's included

Matching the reputation of Porsche for its leading-edge engineering capabilities, we have introduced a 20,000 mile or 2 year service interval for all our Cayman models. (Please refer to your Owner's Manual for your particular Cayman service interval requirement).

Every minor service is carried out by a Porsche trained technician and typically covers elements such as:

- A fault code analysis
- Replacement of your oil filter and engine oil using Porsche recommended Mobil 1 oil†
- Replacement of your pollen filter
- Inspection for: leaks and abrasions, the vehicle's underside and engine bay, coolant hoses, coolant (level and antifreeze check), air intake, radiator, brake system, brake hoses and lines, drive shafts, tyres, locks and latches, electrical equipment, horn, windscreen wiper washing system and lighting system (including headlights and indicators)
- A final test drive to check all of the major systems on your Porsche for their effective operation. Items tested during the test drive include (if applicable): remote control, front seats, foot and parking brake, engine, clutch, steering, transmission, ParkAssist, speed control, PSM switch, PASM switch, Sport switch, heating, air conditioning system and instruments. A final post-drive level check is then conducted.

All of the above items are included in the scheduled pricing structure.

Possible additional costs

Depending on the model, age and mileage of your vehicle, your Cayman may require some additional maintenance work. Items covered are priced individually in the Service pricing booklet and may include:

- Check/replace drive belt
- Change brake fluid

Any additional work required will be individually quoted and fully discussed with you prior to any work commencing.

†Porsche recommends you carry a one-litre Mobil 1 top-up between services.

Major service for your Cayman

What's included

Recent innovations in reliability and technology have enabled Porsche to introduce a major service interval of 40,000 miles or 4 years on all our Cayman models. (Please refer to your Owner's Manual for your particular Cayman service interval requirement).

As time and distance between services has generally increased, so has the importance of these services. In addition to elements covered by a minor service, every major service typically covers elements such as:

- Replacement of air cleaner element
- Check condition and adjust (if required): fuel system, parking brake, clutch, steering gear, tie rod ends, axle joints, running gear, exhaust system, suspension and seat belts
- A final test drive to check all of the major systems on your Porsche for their effective operation and a final post-drive level check. Items tested include all those listed under minor service.

All of the above items are included in the scheduled pricing structure.
